EXPERIENCE

Contract Fullstack Engineer — Data Analysis Team

December 2025 – March 2026

Robust Support & Services

Karachi, Pakistan

- Built high-performance web applications and data-driven dashboards using Next.js and Streamlit to centralize back-office oversight and reporting.
- Engineered automated data synchronization pipelines and scheduled update tasks via CRON jobs, ensuring high data integrity and real-time accuracy across systems
- Managed the full deployment lifecycle on Linux-based environments, configuring server-side resources to ensure system stability and high availability for internal services
- Architected internal automation scripts to handle timely data updates, significantly reducing manual administrative overhead and improving workflow efficiency

Full-Stack Developer

July 2023 – October 2023

Farmevo.ai

Karachi, Pakistan

- Built and launched a modern, responsive application using React and Tailwind CSS, establishing a library of reusable components that improved development velocity and long-term maintainability
- Architected and integrated a flexible GraphQL API using Hasura, which significantly optimized data fetching and streamlined communication between the frontend and backend systems.
- Implemented efficient client-side state management and caching with Apollo Client, enhancing the overall user experience through faster load times and UI responsiveness.

Associate Software Engineer

Nov 2021 – June 2023

Elphinstone Inc.

Karachi, Pakistan

- Engineered and automated CI/ CD pipelines using *GitHub Actions* and *Docker* for deployments to *AWS (ECS/ EKS)*, which reduced deployment times and manual errors.
- Developed a secure mobile application for identity verification using *React Native* and integrated it with ORY for robust identity and access management.
- Architected a SECP-compliant pension and voluntary savings platform featuring a GoLang and Temporal KYC engine, Kafka event streaming, and ORY identity management, deployed on AWS EKS
- Configured and managed an APISIX API gateway on EKS to handle all service routing and traffic for the microservices architecture

PROJECTS

Aafiyaat Wellness Platform | *Next.js, Supabase, Node.js, Tailwind CSS*

- Built a clinical wellness scoring engine processing 16 weighted medical parameters into a 0–100 composite score, deployed across multiple clinics with bilingual WhatsApp scorecard delivery for physicians and patients.

ERP Implementation for Export Business | *ERPNext, Python, Frappe*

- Implemented a multi-branch ERPNext deployment for a multi-country export business, centralizing inventory, procurement, and reporting with Smart Sync for cross-branch data synchronization.

TECHNICAL SKILLS

Frontend: Next.js, React, JavaScript, TypeScript, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, GoLang, RESTful APIs, GraphQL

Databases & APIs: SQL, Hasura, REST, SOAP, gRPC

DevOps & Deployment: Docker, AWS (ECS/ EKS), GitHub Actions, Terraform, Netlify, GitHub

AI Tooling: Claude, Cursor, GitHub Copilot

EDUCATION

Karachi University

Bachelor of Sciences in Mathematics

Karachi, Pakistan

Jan. 2025
