SUMMARY

Full-stack engineer with 4+ years across product and infrastructure: GoLang, Next.js, Kafka, Temporal and AWS EKS. Currently running a small consultancy delivering ERP and health-tech systems end to end. Open to remote and contract engineering roles.

EXPERIENCE

Founder & Technical Lead

September 2025 – Present

HNGM Labs Pvt. Ltd.

Karachi, Pakistan

- Delivered a multi-entity *ERPNext* implementation for a pharmaceutical export group operating across several countries replacing an outdated system with a parent/subsidiary company structure, USD inter-company document chains, batch-level pricing with FEFO expiry tracking, and per-company RBAC via custom Frappe server scripts.
- Reverse-engineered the outgoing system's proprietary data files to design and execute the migration path, and authored the full implementation plan, QA runbook and technical documentation set for client handover.
- Led design and delivery of *Aafiyat*, a health-tech wellness platform (Next.js, Supabase, GoLang microservice) with a clinical scoring engine converting 16 weighted parameters into a 0–100 composite score, deployed across multiple clinics with bilingual WhatsApp scorecard delivery.
- Built and shipped client marketing sites (*Astro* with React islands, Tailwind CSS, GSAP on Netlify) with integrated lead capture, plus distinct tokenized brand systems applied across web, print and event collateral.
- Produced investor and sponsorship collateral (pitch decks, financial models, event assets) supporting institutional funding conversations and pharmaceutical sponsorship pitches.

Contract Fullstack Engineer — Data Analysis Team

December 2025 – March 2026

Robust Support & Services (concurrent contract)

Karachi, Pakistan

- Built web applications and data-driven dashboards using Next.js and Streamlit to centralize back-office oversight and reporting.
- Engineered automated data synchronization pipelines and scheduled update tasks via CRON jobs, maintaining data integrity and accuracy across systems.
- Managed the full deployment lifecycle on Linux-based environments, configuring server-side resources for stability and availability of internal services.
- Architected internal automation scripts to handle timely data updates, cutting manual administrative overhead.

Full-Stack Developer

July 2023 – October 2023

Farmevo.ai

Karachi, Pakistan

- Built and launched a responsive application using React and Tailwind CSS, establishing a library of reusable components that improved development velocity and long-term maintainability.
- Architected and integrated a *GraphQL* API using Hasura, optimizing data fetching and streamlining communication between frontend and backend systems.
- Implemented client-side state management and caching with Apollo Client, improving load times and UI responsiveness.

Associate Software Engineer

Nov 2021 – June 2023

Elphinstone Inc.

Karachi, Pakistan

- Architected a SECP-compliant pension and voluntary savings platform featuring a *GoLang* and *Temporal* KYC engine, *Kafka* event streaming, and ORY identity management, deployed on *AWS EKS*.
- Configured and managed an *APISIX* API gateway on EKS to handle all service routing and traffic for the microservices architecture.
- Engineered and automated CI/CD pipelines using *GitHub Actions* and *Docker* for deployments to *AWS (ECS/EKS)*, reducing deployment times and manual errors.
- Developed a secure mobile application for identity verification using *React Native*, integrated with ORY for identity and access management.

TECHNICAL SKILLS

Backend & Distributed Systems: GoLang, Node.js, Express.js, Python, Temporal, Kafka, RESTful APIs, GraphQL, gRPC
DevOps & Infrastructure: Docker, AWS (ECS/EKS), Kubernetes, APISIX, Terraform, GitHub Actions, Linux, Netlify
Databases & Data: PostgreSQL, SQL, Supabase, Hasura, REST, SOAP
Frontend: Next.js, React, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3
Platforms: ERPNext/Frappe, React Native, Astro
AI Tooling: Claude, Cursor, GitHub Copilot

EDUCATION

Karachi University

Bachelor of Sciences in Mathematics

Karachi, Pakistan

Expected Jan. 2029
